fig 1.3

Source: *independent.co.uk*: Countries with the biggest nuclear arsenals

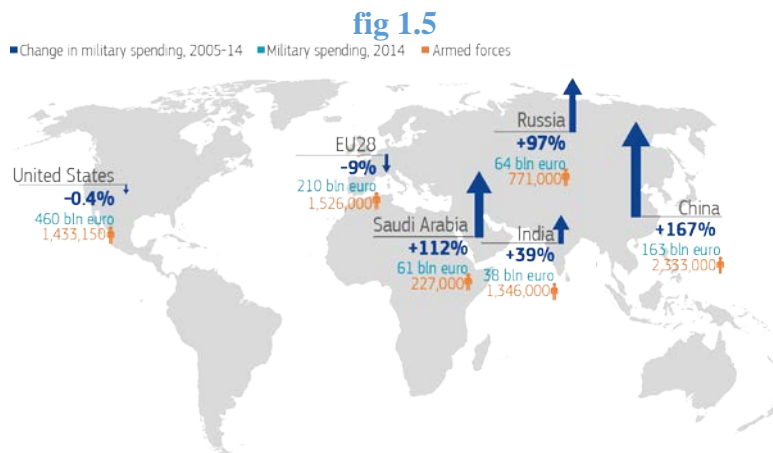

- The comparison of defense budgets as percentage of overall GDP for three countries places the USA on the top, followed by India, and then China.
- Although the defense budget of the US decreased in 2015 yet the spending was some \$100 billion more than its inflation-adjusted cold war average. China’s 2015 budget was approximately same as that of 2014, whereas India slightly decreased its budget in 2015 as compared to 2014.
- In terms of nuclear arsenals, the United States is above China with number of nuclear warheads as 250, as compared to the US with 7,200 and India with approximately 110.

Source: *washingtonpost.com*: Changes in military spending

- The United States is ranked first for having the most powerful military in the world. China has the rank 3rd and India is ranked 4th in this context.
- A comparison of the change in military spending and armed forces across different countries shows an increase in China by 167%, a decrease in United States by 0.4%, and an increase in India by 39%.
- These countries have signed up collaborations with different nations in order to strengthen their defense positions and prepare themselves against the challenging national security issues.
- India has defense collaborations with Russia and the USA. Bilateral partnership between the US & India has strengthened over the last decade, especially after signing the New Framework for Defense Cooperation in 2005.
